Subject: FW: Another Attempt at the Cooperative Agreements

Categories: 11-19 to 1-10 2014

Jannine, I guess by posing the question here, I am requesting that costs be pre-awarded. Many different activities are being undertaken at two of these three components. Tribes resources are limited and being exhausted at a rather fast pace. Tribal homelands are being impacted and will continue to be impacted over a great length of time.

Tribes signed a peace treaty in 1868 where they were provide certain rights. In order to utilized these treaty rights, Tribal members are required to live on the Reservation. This is why it essential to ensure protection of our homelands and our people as well as the local communities.

Some of the environmental contaminates are being addressed but others remain reactive and ignitable for a great length of time (up to 10,000 years which addresses the phosphorus contamination only). Toxic gases are being generated in the RCRA Ponds and to date, the UAO only addresses the generation of these gases nothing about identifying or rectifying the source(s).

It is unfortunate that some industries neglect their responsibilities and continues. At least one of the PRPs is willing to a point to try and cleanup their mess.

Let me know what is needee3d to officially request HQ involvement. If this email works , consider it done but if an official Tribal Chairman signed letter is needed, let me k now.

Thanks

Kelly

Also the Tribes are trying to close out the costs associated with the 2013 cooperative agreement. With the extension granted through the end of October, we need to transfer funds from the Off-site component as set up to cover charges accrued against FMC and Simplot equally. This was the earlier question of the amount around \$750. Neither the FMC or Simplot line item numbers have funds remaining in them but resources where available in the Off-site component. Please let me know so I can get the financial records completed.

☺

Subject: Another Attempt at the Cooperative Agreements

Good day everyone, please find attached copies of the three different components to the EMF Cooperative Agreement or individual agreements. Let me know if these work for you guys and I will get the other paperwork completed. Can the November charges be covered under this?

Thanks

Kelly
